AIMERS FLOWERS

BACHELOR BUTTONS

An extremely easy to grow annual. Sow directly outdoors where they are to bloom mid April to mid-May, after the soil has warmed up 18C (65F). Lightly cover seed with sifted, fine soil or sand. Keep moist during the 10 day germination period. Thin plants 20cm (8") apart in the garden. Bachelor Buttons do not transplant well.

9005 - CLASSIC FANTASTIC MIX

Tall 80-100cm (32-40") plants produce a well balanced, eye-catching blend of captivating blue shades. Flowers often are two shades of blue or have dark centres and lighter petals. Excellent for the border or as cutflowers. Blooms showy May through September.

Pkt \$2.95

9010 - CLASSIC ROMANTIC MIX

Tall 80-100cm (32-40"). A mix of charming pink and pretty rosy-red shades. Flowers are often in two shades of pink or have dark centres and light petals, others are rosy-red with white tips. A great border plant.

Pkt \$2.95

9005 - BACHELOR BUTTON
Classic Fantastic Mix

BUTTERFLY FLOWER

Start seed late February to the end of March for summer bloom. Germinate at 25C (75F) for 10-25 days. Grow on the dry side to reduce chance of damping off. Full sun is best. Space plants at least 30cm (1') apart. Keep soil moist until established.

9023 - SILKY FORMULA MIX

A must for the butterfly garden. Silky Formula Mix is a fabulous blend of gold and deep red flowers. In the fall foliage turns bronze. Blooms later in the summer from early indoor sowings. A favourite of many kinds of butterflies, especially the Monarch. We suggest growing this plant as an annual. Hardy to zone 7.

Pkt \$2.95

BUTTERFLY MEADOW

Sow seed directly outdoors where they are to bloom mid April to mid-May after the soil has warmed up. Thin to stand 20cm (8") apart in the garden.

9025 - BUTTERFLY MEADOW

A mixture of annuals and perennials, in a rainbow of colours. Includes, Alyssum, Africa Daisy, Bachelor Buttons, Butterfly Weed, Candytuft, Columbine, Purple Coneflower, Prairie Coneflower, Coreopsis Plains and Lance Leaf varieties, Cosmos, Scarlet Flax, California Poppy, Siberian Wallflower. Average plant height 75cm (30").

Pkt \$2.95

CALIFORNIA POPPY

Tolerant of hot sun and dry conditions. Direct sow mid-May planting 6mm (1/4") deep; thin to stand 20cm (8") apart when plants are 5cm (2") tall. For an earlier start, sow indoors 6 weeks before last frost.

9040 - THAI SILK FORMULA MIX

Bushy, compact plants with contrasting, finely-cut grey-green foliage, flowers all summer long in beds or containers. Height 20-25cm (8-10").

Pkt \$2.95

9045 - ROSA ROMANTICA

Double flowered California poppy. Incredibly attractive, romantically coloured salmon-pink and carmine gradually fading to a soft pink. Petals are lightly striped and brushed for an exquisite finish. The flowers open into a tulip shape.

Pkt \$2.95

9050 - MILKMAID

Masses of creamy white/yellow, fluted and semi-double flowers above a fine blue-green foliage. Excellent for containers, mass planting in borders or with other low growing annuals. Height 20-25cm (8-10").

Pkt \$2.95

9050 - CALIFORNIA POPPY
Milkmaid

9055 - CALIFORNIA POPPY
Mission Bells

9055 - MISSION BELLS

Enjoy a spectacular display of glowing flowering jewels the same year sown. A mixture of glorious colours. If you're a fan of California Poppies (Who isn't?), Mission Bells will exceed expectations!

FAX (519) 886-0605

www.oscseeds.com

9105 - SEASHELLS MIXED

COSMOS

Best results are achieved when this seed is directly garden sown although some prefer to start it indoors 4 weeks before last frost. Choose a full sun location, sow 6mm (1/4") deep mid to late May. Thin plants 30-40cm (12-16") apart in the garden. Annual.

9100 - DOUBLE CLICK

A reliable summer annual that will add height and colour to the garden border all summer long. Large plants, to 80cm (31") tall.

Pkt \$2.95

9105 - SEASHELLS MIXED

Unusual tubular petals grouped around a bright yellow centre. Flowers average 5cm (2") across in a pastel blend of rose, pink and white. Sturdy plants, uniform flowering and a lacey, cut foliage. Excellent for tall backgrounds and borders. A good cutflower, too. Grows about 1m (39") tall.

9110 - CANDY STRIPE

Ice white flowers boldly splashed, bordered and striped with crimson...some even stay pure crimson on the same plant. A unique colour in Cosmos. When mature, plants grow to 90cm (3') tall.

Pkt \$2.95

CARNATION

(*Dianthus caryophyllus*) Best started 8 weeks early indoors. Sow seed 3mm (1/8") deep and keep at 21C (70F). Transplant to the garden late in May. Transplant 30cm (1') apart.

9060 - PICOTEE FANTASY MIX

Picotée fantasy mix is a lovely blend of large, double, striped and picotéed blooms on strong, robust plants. Matures to 60cm (2') garden height.

Pkt \$2.95

9110 - CANDY STRIPE

COLEUS

Seeds need light to germinate. Keep seeds moist until they germinate. Seedlings will appear within a couple of weeks. Transplant to containers or the garden after all danger of frost has past.

9075 - BLACK DRAGON

Attractive, curious looking ruffled, dark burgandy leaves. Best colour displayed in bright, indirect light. Tolerant of shade. Grow in pots or in the garden. Mature height to 30cm (12"). Start indoors eight weeks before last spring frost.

Pkt \$2.95

COLUMBINE

(*Aquilegia*)

Easy to grow perennial. Chill seed 4 days at 5C (40F) prior to sowing. Start 8 weeks early indoors but do not cover as light is required for germination. Germinate at 21C (70F). Outdoor sowing can be made in late May or June for bloom the following year. Zone 3

9085- LIME SORBET

New flower colour, 'lime-on-white'. Mature plants reach 1m (39") garden height.

Pkt of 10 sds \$2.95

9085 - LIME SORBET

9075 - COLEUS BLACK DRAGON

9130 - DAHLBERG DAISY

9060 - CARNATION Picotee Fantasy Mix

CUP AND SAUCER VINE (Cobea)

Start 3-4 weeks early indoors in pots, cover with 3mm (1/8") of soil and keep moist during the 8-10 day germination period. Germinate at 21C (70F). Cover seed with a fine sifting of moist peat moss. Keep moist.

9070 - SCANDENS BLUE

Long-stemmed bell-shaped flowers average 5cm (2-1/2") across in a deep purple-blue hue. Blooms until fall frost. Can climb to 4m (12') tall if given support or a wall to grow on.

Pkt \$2.95

DAHLIA

(100 sds)

Start 6-8 weeks early indoors. Barely cover the seed and keep moist during the 7-14 day germination period. Germinate at 21C (70F), grow on at slightly cooler temperatures of 16C (60F).

9135 - STARGAZER

A new Dahlia with unique cactus flowers born on dwarf, well-branched plants.

Pkt \$2.95

9140 - HARLEQUIN MIXED

Semi-double, multi-coloured. Small plants bloom all summer. Pkt of 15 sds \$2.95

9070 - SCANDENS BLUE

9135 - STARGAZER

DAHLBERG DAISY

You'll find the Dahlberg Daisy easy to grow. Plants are compact all summer long. They almost thrive on neglect. Start seed directly outdoors in a full sun location or directly into containers.

9130 - GOLD CARPET

Plants 30cm (1') high and wide have a light green ferny foliage and are filled with single, daisy-like yellow flowers. Blooms all summer long in full sun and well-drained garden soil.

Pkt \$2.95

FLOWERING CABBAGE and KALE

Another great annual for summer colour. Start seed 8 weeks early in peat pots, germinate at 20C (70F) for 10-15 days. See colour starting to show by June or July. Sow seed 3mm (1/8") deep. Transplant 30cm (1') apart after spring frosts danger.

9150 - OSAKA SERIES MIXED CABBAGE

Best colour late summer to early fall. Very colorful wavy edged leaves and tight centres make Osaka an excellent ornamental variety for bed and borders. Height 30cm (1').

Pkt \$2.95

9160 - NAGOYA SERIES MIXED KALE

Excellent for filling in barren spaces after summer flowers have bloomed. Uniform plant habit and growth with a high degree of cold resistance to extend flowering. Leaves are tightly fringed and colourful.

Pkt \$2.95

9140 - HARLEQUIN MIXED

9150 - FLOWERING CABBAGE

9190 - GAILLARDIA Arizona Red

GAILLARDIA

(400 sds/g)

Easy to grow. Thrive in hot dry summers heat and full sun. Excellent for garden or cutting. Sow indoors or outdoors anytime from April through August. Germinate at 20-25C (70-80F) soil temperatures for 14-21 days. Do not cover seeds as light helps speed germination.

9190 - ARIZONA RED SHADES

A flower power that's second to none! Deep crimson 10cm (4") flowers literally smother the plant from late spring through September. Compact plants average 30cm (1') height.

Pkt \$2.95

GAZANIA

(400 sds/g)

Slow growing annual. Start indoors 8-10 weeks before last spring frost indoors. Germinate in total darkness at 17C (62F) for 7-10 days. Grow on at cooler temperatures. Do not overwater. Sensitive to wet soil.

9195 - FROSTY KISS MIX

Compact plants 20-25cm (8-10") size and look absolutely stunning in the hot sun. A formula mix of eight spectacular colour combinations.

Pkt \$2.95

9195 - GAZANIA Frosty Kiss Mix

PERENNIAL GERANIUM

Start January/February. Sow seed 6mm (1/4") deep and maintain a temperature of 21-24C (70-75F) during the 5-20 day germination period. Grow on at 15-18C (60-65F). Transplant to 10cm (4") pots for growing on. Move to the garden after all danger of frost has passed spacing 45cm (18") apart.

9205 - VISION PINK

Saucer-shaped pink flowers with ornate red veins blooming May-August are a striking contrast to the dark green foliage which turns to red in the fall. Mounded plants reach 40cm (16") garden height. Good in full sun to light shade. Pkt of 8 sds \$2.95

HIBISCUS

Spectacular perennials for sunny backgrounds. Start 6 weeks early indoors; germinate at 21C (70F) for 5-7 days—soak seed for 12 hrs prior to sowing. Hardy to Zone 5.

9220 - CAROLINA MIXED COLOURS

Big, bold dramatic flowers in red, pink and white with a contrasting eye. Flowers mid-summer through fall.

Pkt \$2.95

9205 - PERENNIAL GERANIUM Vision Pink

HOLLYHOCK

Old fashioned cottage garden perennial. Direct outdoor sowing May or September will produce flowers the following summer. Space plants 60cm (24") apart. Zone 2.

9225 - DOUBLE APRICOT

Fully double flowers of bright apricot.

Pkt \$2.95

9230 - QUEENY MIXED

Dwarf plants, mixed colours. Blooms the first season from early sowings. Grows 50cm (22") tall, perfect height for a place in any garden.

Pkt \$2.95

9232 - HALO MIXED

A stunning combination of single flowers in bright colours, each flower made more appealing by the centre "halo". Blooms 5-8cm (2-3") size lots of them. Makes a beautiful cutflower and the edible flowers can be added to salads for a tasty treat. Plants mature to 1.5-1.8m (5-6') height.

Pkt of 15 sds \$2.95

9220 - HIBISCUS Carolina Mixed

9225 - DOUBLE APRICOT

HYACINTH BEAN

(Dolichos)

Annual. Start seed directly in the garden late May. Support vines.

9240 - DOLICHOS LABLAB

Ruby pods appear throughout the summer. Grow like a pole bean as plants reach 2m (6') height plus.

Pkt \$2.95

LIATRIS

A pretty cutflower or border perennial. Sow seed indoors early March. Do not cover seed as light is beneficial to germination.

9275 - BLAZING STAR

Pretty rose-pink, pipe-cleaner shaped flowers over grass-like foliage. Blooms July and August. Liatris is not Loosetrife.

Pkt \$2.95.

MALVA

(Sylvestris)

Malva is smaller and more refined than it's relative, the Hollyhocks. Blooms well into fall when other flowers have died. A great source of nectar for bees, hummingbirds and butterflies. Zebra mallow can be very short lived and reseeds quite readily. Free blooming, easy to grow. Chill seed 3-4 days prior to sowing. Start early indoors for blooms in the first year, or sow directly in June for flowers the next year. Hardy to zone 5.

9290 - ZEBRINA

Tall 90-120cm (3-4') stems are covered with 5cm (2") blooms An old fashioned favourite.

Pkt \$2.95.

Ostrich Feather Blue9330 - MORNING GLORY
Feringa9315 - MORNING GLORY Blue
Ensign

9300 - MARIGOLD Jolly Jester

MICHAELMAS DAISY

(Aster)

Annual. Sow seed directly outdoors in mid-May. Note – germination can be irregular and ranges from 50-80%.

9310 - OSTRICH FEATHER BLUE

Huge feathery flowers on branching stems. Blue blooms and very early flowering. Matures to 50cm (20") height. Pkt \$2.95

MORNING GLORY (VINE)

(Ipomoea spp.)

Easy to grow, climbing types for quick colour on fences, walls or trellis in full sun to partially shaded areas. Soak seed for 24 hours prior to sowing directly in the garden. Sow mid-May. Vines will grow to 4 m (13') in height.

9330 – FERINGA

Fluorescent combination of violet and rose pink trumpet-shaped flowers. Very unique colour blend.

Pkt \$2.95

MORNING GLORY (BUSH)

(Convolvulus tricolour)

Dwarf, compact plants only 30cm (1') tall are great for informal planting schemes and summer beds. Sow seed directly outdoors where it is to bloom. Soak seed for 6-12 hours prior to sowing and cover with 3mm (1/8") of soil. Keep moist during the 10 day germination period. Annual.

9315 - BLUE ENSIGN

Brilliant blue flowers with contrasting throats of white and yellow sit just above the foliage on these neat, compact plants. Blooms June through September, sometimes into October. Pkt \$2.95

NASTURTIUM

Easy to grow annual for baskets, window boxes or mass plantings. Do not over-fertilize. Direct garden sow mid to late May 2.5cm (1") deep, thin to 20cm (8") apart. Full sun is preferred but partial shade is better in areas with hot summer temperatures. Blooms are edible.

9340 – PEACH MELBA

A real colour breakthrough in Nasturtiums – warm orange-peach flowers have contrasting red veined throats with an attractive marbled foliage. An outstanding combination! Pkt \$2.95

9345 – WHIRLYBIRD CREAM

Compact, bushy plants produce semi-double, propeller-like flowers that sit atop its rich, bright green foliage. Free-flowering, tolerant of drier soils. Outstanding in baskets or borders. Matures to 30cm (1') height. Pkt \$2.95

9390 - PHLOX
Century Blue Star

PHLOX

A great annual for summer colour. Start seed 8 weeks early in peat pots as Phlox does not transplant well. Peat pots can be directly garden sown when plants are large enough to go to the garden. Germinate at a maximum soil temperature of 18C (65F) for 10 days in total darkness as it improves germination results. (Warmer temperatures prolong germination time.) Transplant 45cm (18") apart in the garden after danger of frost has passed.

9390 - CENTURY BLUE STAR

Hybrid Phlox. Blue flowers fade to almost white at the outer edge of petals creating an antique look. Garden height is 25cm (10"). Grows well in pots and baskets. Pkt of 10 sds \$2.95

MARIGOLD

The "everywhere plant". Full sun. Sow six weeks early indoors, lightly cover with 3mm of soil and germinate at 21C for 10 days. Sow direct mid May.

9295 – SIGNET LEMON

Known as Mexican Marigold when first introduced in 1798 these very dwarf, mounding plants mature to only 25cm (10") tall. They boast a fresh green, lacey foliage aromatic of citrus and are loaded with small, dime-size, single flowers. In constant bloom all summer. Sow in a group of 3-4 plants per 60cm² (9 sq. inches) Pkt \$2.95.

9300 – JOLLY JESTER

A very distinct and novel variety with brilliant red petals very distinctly divided by yellow stripes. Excellent for tall borders. Pkt \$2.95

9340 - PEACH MELBA

9345 - WHIRLYBIRD CREAM

9095 - PURPLE CONEFLOWER
Paradiso Mix

9407 - RUDBECKIA Denver Daisy

ORIENTAL POPPY

Perennial. Long stemmed flowers, unusual colour range. Start seed indoors in February or early March. Germinate at 20C (70F) for 14-21 days then grow on at slightly cooler temperatures. Do not cover seed as light aids germination. Outdoor sowing should take place anytime from May to mid-July or late fall for germination the following spring.

9350 - CORAL REEF

Large, vibrant flowers. Intense coral pink colour. Spectacularly vivid when sown en-masse. Vigorous plants flower over a long season typically lasting May through August. Height to 60cm (24") tall.

Pkt \$2.95

9355 - CHECKERS

Pure, silky white flowers individually marked with a deep black cross for the ultimate contrast! These sturdy plants with their rich green foliage are ideal for brightening borders or as cutflowers. Height 75cm (30").

Pkt \$2.95

PURPLE CONEFLOWER

Outstanding perennials for the border. Tolerant of full sun to light shade. Flowers the first year from early indoor sowings. Start seed during January or February for July or August flowering. Sow seed 3mm (1/8") deep. Germinate at 18C (65F) for 10-20 days; grow on at cooler temperatures of 15C (60F).

9090 - PRIMADONNA DEEP ROSE

Early, larger and longer lasting daisy-like, lavender blooms up to 12.5cm (5") diameter, cone-shaped centre. Matures to 90cm (3') garden height.

Pkt \$2.95

9095 - PARADISO MIX

Perennial. An exciting blend of colours and flower forms. Flowers the first year from early January sowings. Sow 3mm (1/8") deep. Full sun is best. Germinate at 18C (65F) for 10-20 days. Garden height is 30-40cm (12-16").

Hardy to Zone 4.

Pkt of 10 seeds, \$2.95

ROSE of SHARON (Perennial Hibiscus)

(Hibiscus syriacus)

A gorgeous shrub, very cold tolerant. Hardy to zone 5. A cold germinator. This seed should be stratified. Place seed in planting tray, moisten, wrap in plastic and freeze for 5 weeks then move to a bright, warm spot for germination. This usually takes 14-21 days, occasionally more.

9410 - ROSE OF SHARON

Produces rose-red 10cm (4") single/double flowers with a contrasting eye. Grows to 3 m (10') height at maturity, spreads 2 m (6') wide. An excellent lawn highlight, hedge or windbreak.

Pkt of 10 sds \$2.95

9410 - ROSE OF SHARON

RUDBECKIA

No garden is complete without 'Black Eyed Susan' plants. This robust perennial withstands heat and drought better than most. Start seed indoors February through March for blooms the first season. Germinate at 20C/70F for 14-21 days. Transplant to a partial shade to full sun location. Direct sowing in late fall is works well, too.

9409 - MORENO

A free flowering Gloriosa Daisy with deep chocolate petals that radiate through bronze, orange to yellow at their tips. Very compact, 30cm (12") plants are loaded with flowers mid-summer through late fall. Heat tolerant, tender perennial, best treated as an annual.

Pkt of 50 sds \$2.95

9407 - DENVER DAISY

Extreme heat tolerance, summer long flowering and an ability to perform under extreme conditions. Strong, robust plants are adorned with masses of golden yellow flowers with rusty red rings, and dark centre. Its bushy habit ensures it won't fall over in adverse weather. Mature plants reach 45cm (18") height.

Pkt 25 sds \$2.95

9408 - TIGER EYE (HYBRID)

Basal-branching plant habit with a bushy appearance and a width and height that's just about equal. Long-lasting double flowers with golden yellow petals and a dark brown centre disk. Height and spread in the garden is 40-60cm (16-24").

Pkt 25 sds \$2.95

SHADES OF BLUE

Mixed annual blue flowers. For early blooms, start seed eight weeks before last frost under lights or in the greenhouse. Directly sow or transplant into the garden after all danger of frost has past.

9415 - BLUE SPLENDER

Try something a little different in this year's garden. Sow this colour themed packet of mixed annual blue flowers for an outstanding garden display. Blue is the rarest colour in the garden. Our expertly selected all blue mix provides an unexpected array of rich pastel hues.

Pkt \$2.95

SUNFLOWER

(*Helianthus*) Annuals

Sow directly outdoors where they are to bloom late May. Choose a well drained sunny location. Sow seed 6mm (1/4") deep. Thin seedlings 30cm (12") apart. Germinates best at 20C (70F). Fertilize several times over the season for improved flowering.

9440 - PEACH PASSION

High quality peach coloured flowers with a darker centre. Multiple flower stems from single stalks. An unique cutflower or border plant. Flowers are 12cm (4") diameter.

9440 - SUNFLOWER
Peach Passion9470 - SWEET PEA
Strawberry Sundae

9475 - SWEET PEA Incense Mix

9480 - BLUE WOODRUFF

SWEET PEA

Annual Sweet Peas are hard to beat. Sow into full sun to partial shade and well-drained soil. Soak seed 24 hours prior to planting. Direct garden sow April/May when the soil is workable and still quite cool. Sow 6-12mm (1/4-1/2") deep, group seeds 5cm (2") apart. Germination can take up to 16 days, sometimes longer. Hot dry summers tend to limit growth and flowering. Irrigate during drought. Thin to 10cm (4") apart. Keep well watered. Excellent along fences, walls and used as cutflowers.

9455 - STREAMERS MIXED

Unbelievable colour combinations that will turn heads wherever planted. All streamers are striped with white flakes throughout the flower.

9460 - OCEAN FOAM MIXED

Navy-blue; light blue and frothy cream.

9465 - RED ROVER MIXED

Various shades of scarlet, deep red striped red and white plus soft pinks.

9470 - STRAWBERRY SUNDAE

Pastel blend of pink, rosy bi-colour and white.

9475 - INCENSE MIX (MOST FRAGRANT)

Our most fragrant mix by far. Early blooming, long stemmed, heat tolerant and the broadest range of colours. Great for garden or cutflowers.

All Sweet Peas above:
Pkt \$2.95

BLUE WOODRUFF

(*Asperula orientalis*) Annual. Originally from Turkey this low growing beautiful annual flower does well in partial shade to filtered sunlight. Performs well in pots too, as long as it is not allowed to dry out between watering. Sow directly outdoors late in May or early June.

9480 - BLUE WOODRUFF

Small, delightfully fragrant, tubular flowers of lavender-blue bloom throughout the summer months. Attractive in the garden, in pots and a butterfly favourite too! A graceful annual for any garden. Matures to 30-40cm (12-16")
Pkt \$2.95

ZINNIA

Annual. Select a sunny location and sow seed mid to late May. Barely cover the seed with a fine sifting of soil and keep moist during the 5-10 day germination period. Best sown directly to the garden. They do not respond favourably to transplanting and often show signs of shock.

SWIZZLE SERIES

Flowers up to 10cm (4") across, completely smother these, full, bushy plants. Very striking in the border or containers. Height is 30cm (1')
